

# SIMEON SIAKA

## CLOUD INFRASTRUCTURE & DEVOPS ENGINEER

Lagos, Nigeria | [simeonvault@gmail.com](mailto:simeonvault@gmail.com)

[linkedin.com/in/simeon-siaka-8a8367312](https://linkedin.com/in/simeon-siaka-8a8367312) | [github.com/simeonprimordial](https://github.com/simeonprimordial)

## PROFESSIONAL SUMMARY

Cloud infrastructure engineer focused on AWS, Terraform, Linux, secure CI/CD, and highly available systems. Physics graduate with hands-on experience designing, deploying, securing, troubleshooting, and documenting production-oriented cloud architectures.

## CORE SKILLS

**Cloud Architecture:** AWS, VPC, IAM, EC2, ALB, Auto Scaling, Lambda, S3, RDS, DynamoDB

**Infrastructure as Code:** Terraform, variables, outputs, validation, state awareness

**Delivery & Operations:** GitHub Actions, OIDC, Docker, ECR, Linux, Bash, CloudWatch

**Security & Documentation:** Least-privilege IAM, private networking, secrets, diagrams, runbooks

## SELECTED CLOUD ENGINEERING PROJECTS

### LogiHaul Reference Architecture | AWS Architecture Capstone

- Designed a six-layer logistics architecture for a 50x traffic-spike scenario.
- Separated elastic order intake from relational billing and driver-record workloads.
- Designed Multi-AZ networking, asynchronous processing, observability, and two-region S3 replication.

Repository: [github.com/simeonprimordial/logihaul-reference-architecture](https://github.com/simeonprimordial/logihaul-reference-architecture)

### FinTrust Customer Portal | Terraform, Docker, AWS

- Built a repeatable three-tier deployment with a public ALB and private application/database paths.
- Containerized the Flask workload, published to ECR, and deployed through Auto Scaling.
- Removed hardcoded runtime secrets and added Terraform, Bash, and Python CI checks.

Repository: [github.com/simeonprimordial/fintrust-customer-portal](https://github.com/simeonprimordial/fintrust-customer-portal)

### NovaTech Serverless Website | Secure CI/CD

- Delivered a static site globally through CloudFront with a private S3 origin and OAC.
- Replaced long-lived AWS deployment keys with GitHub Actions OIDC and temporary credentials.
- Automated validation, S3 synchronization, and CloudFront cache invalidation.

## ADDITIONAL PROJECTS

CloudDesk Multi-Tenant SaaS | Highly Available Web App | FinTrust NLB Docker Service

Lagos Law Firm S3 DMS | AWS 80 Projects Challenge

## EDUCATION & DEVELOPMENT

### Bachelor of Science in Physics

Quantitative foundation in analysis, technical reasoning, and structured problem solving.

### Preparing for AWS Certified Solutions Architect - Associate

Current focus: resilient, secure, performant, and cost-aware AWS architecture.
